

How to make a Minion amiibo holder

Kids, ask a grown-up for help with the scissors!

1. Print out this sheet on heavy paper, such as cardstock.
2. Carefully cut out the background, middle, and base pieces.
3. Cut red, blue, and yellow slots where indicated along the solid lines.
4. Create a loop out of the back piece, then secure it by notching together the slots at either end.
5. Attach the middle piece to the base using the matching blue slots.
6. Attach the background piece to the base using the matching green slots.
7. Put your amiibo figure in the holder. You're now ready to rally the troops!
