

## FOSSIL CUT OUT

Cut along the dotted lines and put the dinosaur back together.

### How to create your own vivosaur fossil

Kids, ask a grown-up to help you!

1. Cut out the shapes along the dotted lines
2. Using the fossil image as a guide, assemble your fossil until it looks just right (you can even try to do it without looking at the picture!)
3. Keep your fossil together with tape, or use a metal paper fastener to keep the pieces together. This way you can make it pose!
4. Enjoy!
