

# CREATE A SUPER CROWN

**\*Kids, ask a grown-up for help with scissors!**

- 1** Cut out the crown and strips along the dotted lines.
- 2** Place the crown on a flat surface with the blank side up.
- 3** See the two little tabs on the sides of the crown? Tape the end of a strip to the end of one of those tabs. Do this for both sides. Make sure the strips are also blank side up when you tape them on.

- 4** Wrap the crown around the top of your head to find the right size. Hold the strips in place, then take the crown off your head and tape the ends of the strips together.
- 5** You can use the extra strip to add length, if needed. Just tape each end to the ends of the other strips!
