Item description:

This is my personal savefile for Naruto Shippuden: Clash of Ninja Revolution 3! It has all the modes, stages and, characters from the shop! I didn't finish all the missions since you don't need to in order to unlock and pay for everything in the shop.

You can use the Savegame Installer OR Data Management to use this save data since I figured out how to get rid of the copy flags on my Wii. The region code is RNEE.

The zip contains these folders:

- RNEE (Savegame Installer)
- RNEE (Wii Data Management)

For the Savegame Installer save:

Just extract the zipped folder and put the extracted folder (RNEE) into a folder called WIISAVES (You might need to make a new folder with that name on the root of your SD card if you haven't done so already...).

Now after all that's done you will need to turn on your Wii and go to the HBC and startup the Savegame Installer. (Make sure your Naruto Shippuden: CoNR3 disc is already in the Wii before doing this) Finally just press RESET on your Wii to install the save! After that you just press the POWER button to return to the Wii Menu with your newly installed save ready to go...

For the Wii Data Management version: (For those that haven't done this before)

I also added a Data.bin version for those who do not have access to the Savegame Installer. But I played online before making this save so hopefully this will work on other Wiis... If it doesn't I could start my save data to before I used the online functions and make a new one.

To use the Data.bin version, rename the RNEE (Wii Data Management) folder to just RNEE and go to private/wii/title on your SD card and put the folder in there. After that you can turn on your wii and go to the Wii Settings, Then Data Management, then Save Data, then Wii. Now click on the SD card tab and you will see the save hopefully... Click on it and press the Copy button to copy the save!

There is also no Wi-fi data either (Savegame Installer for now...) so you should have no problem getting online with this... (Unless the data.bin version doesn't work)

Download: Click Download and in a few moments you will receive the download dialog.

Hi, i hope you still have the save file. Do you mind uploading the data.bin without the online function since I can't move them from Sd to Wii.

Can you tell me why I get a (ret = -106) error when trying to install? The current version of save game installer has a folder on the sd card called saved games. I put the file there it detects and when I try to install it wont work.
